(54) Title: SYNTHETIC CHEMOKINES, METHODS OF MANUFACTURE, AND USES

(57) Abstract: The invention relates to synthetic chemokines, methods of manufacture and uses thereof. The synthetic chemokines of the invention include one or more amino acid deletions at the C-terminus relative to the corresponding wild type chemokine, which also can include one or more covalently attached polymers, as well one or more additional amino acid changes or chemical modifications. The invention also provides synthetic chemokines in a substantially purified oligomeric form, such as, in a monomer or dimer form. Further provided are methods for synthesizing the synthetic chemokines of the invention, pharmaceutical formulations and kits thereof, and their use as research tools and medicaments.

INTERNATIONAL SEARCH REPORT

International application No.

PCT/US05/10212

A CLASSIFICATION OF SUBJECT MATTER IPC: C07K 1/00(2006.01) USPC: 530/350 According to International Patent Classification (IPC) or to both national classification and IPC B. Form PCT/ISA/210 (second sheet) (April 2005)

INTERNATIONAL SEARCH REPORT	International application No. PCT/US05/10212
Continuation of Dan II Bassan 3.	
Continuation of Box II Reason 2: The claims of the instant application do not contain a claim 28, and therefore claim 28 does not appear in any consideration of the claims presented herein.	
Claims 29-31 are drawn to a specific SEQ ID NO 1. The sequence listing as submitted with the instant application is flawed. A PCT Form 225 was sent on 6/15/2005. However, the sequence errors are still present in the sequence, so no search of SEQ ID NO: I was made.	
made.
